Corroborative Testimony.

The London Petroleum Review, of November 23, has the following to may correborating the opinion ex-pressed so frequently in this paper, that oil should hold steady at pres-

At the outbreak of the war at home, ordinary American kero-sene was quoted at 7 4 d. per galdone was quoted at 7 % d. per gallion, with water white a penny doner, at the commencement of hostilities it is is 10 % d. and is 11 % d. respectively per gallon to-day. Lubricating elist take for instance. American paie) then commanded 19 per ton, teday they are (37 10s (nominal); while motor spirit, which was then is 6d per gallon (second quality), is now is a sill though a portion of the latter is taxation.
"We have during the present

week received not a few inquiries as to when the present prices will be reduced. In our opinion, however, though some reduction will be made early in the New Year, one cannot hope that this will be one cannot hope that this will be substantial, nor can one expect that further general reductions will take place for a long time to come. There is no doubt about it that in pre-war days petroleum and its products were far too cheap, many of them being retailed at prices which left no adequate profit anywhere. Even given the return to normal conditions, the quotations for the refined products of petroleum must always remain in ratio to the price of crude oil, and so long as that is present figures—and we see no cause for a reduction—it is unreasonable to look forward to any material decrease in petroleum material decrease in petroleum

posted refiners commenting price on the above, agree that with the with the coming spring great demand for crude, it is unlikely that the price will decline, but Wins With Sincla Wins With Sinclair Oil.

In June, 1904, at the Columbia than ordinary size might have the effect of breaking the market. It would take something about the size of the big wells drilled in Mexico, as long as so many pipe lines are building into the new Texas fields, and each and all must have a supply in storage to justify the great investments. There is approximately 220, 900 barrels per day already under

way in the Texas fields, and is diway in the Texas fields, and is di-vided as follows.

The Prairie s inch line to Drum-right, which will be doubted, in-stead of building to the Chif, which will give them 50,000 barrels ca-

will give them 50,000 barrels capacity.

The Texas company has an A inch line from the Ranger field in Gates, in addition to the Wichita line, and have announced that they will increase this capacity with another Sinch line, giving them a total of 50,000 barrets Cosden & Co will have an Sinch

line in operation by early spring con-necting the Texas fields, with their

Cushing. It will give them a capaci-ty of 20,000 barrels.

The Magnetia in addition to the 5 inch line from Wichita Fails, is building another into the Ranger field from Coodeana, which will give them 40 one barrels capacity. The Gulf company is building ar sinch line eastward from the Ran ger field, which will aid 20,000 bar-rels more. The Sincture people have an-

Most learner for this famous trophy the best between the cup won by her in 1917, but a series of mafortunes virtually kept her out of the compensition. Several new tests have started retained to the work of the Mississippi valley from the final successful gold to produce oil if there is any oil in the deep sands in that vicinity. Several new tests have started retained to the compensition of the Mississippi valley from the Mississippi valley from the final successful gold the Sincilar oil & Gas Co., jointly, cop defender and observers of the races assert that she at no time was required to show her maximum and required to show her maximum and the second at 51 miles. This practically assured final success. The whip-fo-will, ft. took the third farm, the northwest of 15-27 3c. A heal at an average speed of 52 miles an hour affer sundown, but sho came in second.

finish the course within an hour after sundown, but she came in secwhip-Po'-Will, jr., provided a real exhibition of speed, in the one mile trials for a cup presented by the Lake George Regatta association. In these trials each loat makes six runs over the course. The best speed made by the Whip-Po-Will, jr., in these chals was more than 65 miles an host, the average being slightly less than 615 miles. Faster exhibition miles have been driven, but not in official trials for this cup. The previous one mile championship was

The Sincilair people have an anounced the extension of the line from Healthon to the new Texas fields, and this, being an Such line will give them 20,000 barrels daily capacity.

The Conduit Pips Line company has a is inch line partly constructed and will shortly be large down to all in the sustomers and its own refineries in this field.

Anderson a Gustafoon will have a first from the sum of the sum of the company has a sinch line partly constructed and will shortly be large fields, and the customers and its own refineries in this field.

Anderson a Gustafoon will have a failure of the sum of the company has a sinch line from the langer field will be suffered and will shortly be a first of the configuration. There are many refinered to the sum of the company of the construction of boats and in their engineers, and if the oil producer can keep up with the pipe lines and the tank car shipments, he is to be constructed. It is going to be a demand unprecedented in Olidon, when the big fight now started between the liter. National Motors company and the Cord propie to see who can build the cheapest tractor is well under way. The Saturday Evening Post is running a series of articles by Marcowson, which are certainly illuminating and should be carefully read by every man interested in oil.

But most of all, here in Tuisa where oil is the life of commerce, the conceasus of opinion is that the price will hold level if not advance with the coming spring.

Wine With Stociair Oil.

In June, 1994, at the Columbia Wach cloub, New York, the Standard Work during a sign "Official Happy level on the gold cup of the was anothered in the course and a Sinctar laured. Prover boats are fast coming into the row of the morthwast of the southwast of the southwast of the course and a Sinctar laured. Prover loads of the first part of the morthwast of the southwast of the course and a Sinctar laured. Prover loads of the first part of the morthwast of the southwast of the course and a Sinctar laured. Prover loads are first part of the mort

river during the three days of racing.

Power-boats are fast coming into their own as utilities. America has many inland waterware and these waterways can be utilized far more than they have been in the past. The improvement of boats and of fuel to drive them will augment and improve America's distributing facilities and to that extent will promote the country's further advancement.

ent depths, is sufficiently convincing to oil operators that a pool of great proportions will yet be uncovered. But where is this pool? is the question foremost in the minds of those interested in that field. Let us examine the facts as they now are being examined by the large lease holders and drillers in Kay county. It has already been proved that the chances for oil in the 3-160 foot sand are not good either to the north or to the south of 15. The Parker less in the northwest of 22-27-3e was a duster, proving that sand to the

test in 4.27-le was dry in the same sand, demonstrating unproductive-ness of that sand to the north.

Both the Parker and the Lindsey tests as well as all other Carier tests that are dry at 3.100 feet are proceeding to drill, if necessary to the 4.000 foot level. The states no test in the Newkirk field should be considered complete until the bit has penciraled to a depth of from 3.700 to 3.900 feet One big hope of operators is that the deeper sands will contain the real off pool.

Two tests that are now on top of the said at 3,100 feet in 15 will go a

the west.
The Marland gas well on the anti-
